

# Stojan Jovanović, Ph.D.

UK TECH NATION EXCEPTIONAL TALENT · FULL-STACK DATA SCIENTIST · ANALYTICS ENGINEER · MACHINE LEARNING ENGINEER

Oxfordshire, United Kingdom

☎ (+44)74 1316 7439 | ✉ stojanjo@pm.me | 🌐 stojanjo.net | 📠 stojan211287 | 🔗 <https://www.linkedin.com/in/stojanjovanovic211287/>

*A professional with 7 years of experience in data science, machine learning & analytics engineering, proficient at every layer of the modern data stack. Comfortable with both hands-on work, as well as leading a team of data professionals. Strong communicator, able to present abstract concepts in an accessible way to all organisational levels and diverse stakeholders. Experienced technical lead. So far, worked professionally in finance, advertising and healthcare.*

## Skills

Experienced data professional, specializing in data science, analytics engineering, as well as applied machine learning.

<b>Data &amp; Analytics Engineering</b>	dbt, PostgreSQL, DVC, MS SQL Server
<b>Data science and data analysis</b>	SQL, pandas, numpy, tidyverse, SQLAlchemy
<b>Distributed &amp; high-performance analytics</b>	Dask, Ray, Spark, Slurm, Modin
<b>Machine Learning</b>	Scikit-Learn, Pytorch Lightning, Tensorflow, Keras
<b>Visualisation and reporting</b>	Seaborn, Matplotlib, Streamlit, ggplot2
<b>DevOps &amp; IaC</b>	Docker, Kubernetes, Ansible, Helm, ArgoCD, Terraform
<b>Programming languages</b>	Python, Scala, R, shell (bash), Golang
<b>Software engineering</b>	git, CI/CD, API development, ELK Stack
<b>Web technologies</b>	FastAPI, Flask, HTML, css/sass, JavaScript
<b>Cloud platforms</b>	Microsoft Azure, Amazon Web Services

## Relevant Experience

### Sensyne Health plc

Oxford, UK

HEAD OF MACHINE LEARNING ENGINEERING

November 2021 - present

- **Technical strategy role, focusing on ML and analytics engineering. Responsible for developing & maintaining the company's real-world-evidence data product. Leading a small team of ML and data engineers.**
- Led development of the company's real-world clinical data platform product, built on top of dbt, PostgreSQL and Kubernetes.
- Helped grow the ML Engineering and Data teams by designing & conducting 200+ pair-programming and system design interviews for the Data Engineer, ML Engineer and Data Scientist positions.
- Drove the adoption of tools and processes to improve our real-world evidence (RWE) data models reproducibility, provenance (lineage), and sustainability.
- **Tech stack: dbt / PostgreSQL / Kubernetes / Helm / ArgoCD / SQLAlchemy**

### Sensyne Health plc

Oxford, UK

LEAD DATA SCIENTIST

May 2020 - November 2021

- **Tech lead for all ML & Analytics Engineering workstreams. Overseeing multiple projects simultaneously, while consulting with teams of data scientists, ML engineers, software engineers and product managers.**
- Served as technical lead for the company's real-world evidence (RWE) data analytics SaaS product, throughout its full life cycle; from ideation & UX design, through data modelling & backend API development, to scalable cloud deployment.
- Developed a distributed ELT pipeline system, ingesting raw real-world electronic health record (EHR) data and producing standardised & analytics-ready datasets from multiple disparate NHS trust sources for use by internal research and engineering teams.
- Led a team of 4 data scientists to find clinical predictors of Covid-19 disease severity by analysing real-world EHR data, shared by an NHS partner trust during an ongoing pandemic. The research resulted in 2 publications.
- **Tech stack: dbt / PostgreSQL / Kubernetes / Dask / Ray / Helm / ArgoCD / Slurm / DVC**

### Sensyne Health plc

Oxford, UK

SENIOR DATA SCIENTIST

April 2019 - May 2020

- **Sole systems architect for the company's new on-prem AI & data lab. Developed tooling, codes of conduct & best practices for reproducible and rapid data analytics, working with the R&D team leads.**
- Deployed & operationalized HPC facilities (9 node hybrid CPU/GPU system) in the company's AI lab. Designed the HPC analytics & containerization software stacks. Served as the system's interim SysAdmin.
- Led design and implementation of complex, end-to-end ML pipeline enabling delivery on a commercial project worth 5 million pounds. Coordinated collaboration of 4 teams of 30 data scientists.
- Built the company's AI lab infrastructure from scratch - from one shared server to a secure network of 50+ GPU-enabled workstations with air-gapped central GitLab services, private Docker registry, private \*nix package repositories & secure remote storage
- **Tech stack: Modin / Dask / Pandas / PostgreSQL / Python / tidyverse / Ansible / Enroot**

### Adverai ltd

Stockholm, SE

MACHINE LEARNING ENGINEER

May 2018 - Mar 2019

- **Sole ML engineering team member, responsible for introduction of AI capabilities into the company's core software products.**
- Designed and engineered Adverai's entire ML microservice stack, including model serving infrastructure, HTTP/gRPC model prediction APIs, as well as a CI/CD system for automated ML model training & deployment.
- Introduced online time-series prediction and anomaly detection functionality to the company's core software product.
- Mentored two junior data scientists in ML model deployment automation & large-scale data processing.
- **Tech stack: Python / TensorFlow (Serving) / gRPC / Docker / GitLab / PostgreSQL / GraphQL**

## Qliro AB

DATA SCIENTIST

Stockholm, SE

Apr 2017 - May 2018

- **Data analytics team member, responsible for novel credit risk model development, reporting process automation & large-scale feature engineering.**
- Designed and built a system for scheduled re-training and scoring of credit risk models on top of Hadoop, Spark and H2O.ai, automating and significantly speeding up manual credit reserve reporting processes.
- Helped migrate ETL systems from RDBMS to the Spark / Hadoop ecosystem, as data volumes become unwieldy for processing inside our data warehouse.
- Worked closely with the data engineering team to operationalize continuous deployment pipelines for proprietary credit risk models, cutting average ML model deploy time to 1 week, from 2 months.
- **Tech stack: R / ELK stack / Scikit-Learn / Scala / Spark / H2O.ai / SQL Server**

## Kavli Institute for Systems Neuroscience

DATA SCIENTIST

Trondheim, NO

Apr 2016 - Apr 2017

- **Sole data scientist in a biomedical experimental lab. Consulted on all matters of computational science & engineering, working with various teams of researchers.**
- Developed a novel, latent-variable RNN network architecture to predict time series of electrical activity of rat neurons. Publication still being prepared.
- **Tech stack: Torque / TensorFlow / Pandas / Scikit-Learn / Scikit-Image / Jupyter**

## Education

### KTH Royal Institute of Technology & Albert-Ludwigs University

Stockholm, SE & Freiburg, DE

PHD IN COMPUTER SCIENCE & COMPUTATIONAL NEUROSCIENCE

Oct 2012 - Mar 2016

**Thesis: Correlations of Higher Order in Networks of Spiking Neurons. Supervised by Prof. Stefan Rotter & Prof. John Hertz**  
**Joint degree, obtained as part of the Erasmus Mundus Joint PhD Programme**

- Developed algorithms and analytics pipelines to simulate the behaviour of networks of neurons in the cortex, in Python, Cython and C. These pipelines simulated 100,000 interacting cortical neurons for days at a time, producing data that the subsequent analytics pipeline would analyse. Both pipelines were deployed on state-of-the-art supercomputers.
- Obtained a novel mathematical result, enabling prediction of future cortical activity from knowledge of functional connectivity of neurons in the cortex.

### University of Belgrade

MSC IN APPLIED MATHEMATICS & OPERATIONS RESEARCH

Belgrade, RS

Oct 2010 - Sep 2011

- Principle subjects studied: queueing theory, graph theory, stochastic calculus, financial engineering

### University of Belgrade

BSC IN STATISTICS, ACTUARIAL & FINANCIAL MATHEMATICS

Belgrade, RS

Oct 2006 - Sep 2010

- Principal subjects studied: multivariate calculus, statistics, linear algebra, actuarial science, optimization & differential equations

## Talks and workshops

Jan 2017 **Institute for Advanced Study**, The Hawkes Process as a Model of Cortical Networks

Princeton, NJ

Aug 2016 **Los Alamos National Laboratory**, Temporal Evolution of Grid Cell Learning

Los Alamos, NM
